# Tire Science and Technology
# Index to Volume 32
# 2004

| Number | Months | Pages |
|---|---|---|
| 1 | Jan.-Mar. | 1-54 |
| 2 | Apr.-Jun. | 55-118 |
| 3 | Jul.-Sep. | 119-186 |
| 4 | Oct.-Dec. | 187-270 |

**B**

Becker, Eric B.: see Han, Y. H., Jan. - Mar., 23

Belt-leaving-belt
Force Characteristics of Tire Tread Delamination, Jan. - Mar., 41

Belt ring equations
A Study of the In-Plane Force Transmission of Tires, Oct. - Dec., 188

Block stiffness
Measurement of the Slip of Tread Blocks in the Contact Patch, Apr. - Jun., 69

Bolarinwa, O.: see Olatunbosun, O. A., Jul. - Sep., 146

Braghin, F.: see Lupker, H., Jul. - Sep., 164

**C**

Cheli, F.: see Lupker, H., Jul. - Sep., 164

Chen, Buo: Material Characterization of Tire Cords and the Effects of Cord Thermal-Mechanical Properties on Tires, Jan. - Mar., 2

Circumferential ply
Material Characterization of Tire Cords and the Effects of Cord Thermal-Mechanical Properties on Tires, Jan. - Mar., 2

Cleat envelopment
A Study of the In-Plane Force Transmission of Tires, Oct. - Dec., 188

Conference Announcement
23rd Annual Conference of the Tire Society, Jan. - Mar., 54
23rd Annual Conference of the Tire Society, Apr.-June, 116

Constitutive models
Evaluation of a Pseudo-Elastic Model for the Mullins Effect, Jul. - Sep., 120

Contact
Tire Modelling Methodology with the Explicit Finite Element Code LS-DYNA, Oct. - Dec., 236
Analysis of Tire Rolling Contact Response by REF Model, Oct. - Dec., 214

Contact patch
Measurement of the Slip of Tread Blocks in the Contact Patch, Apr. - Jun., 69

Crack growth rate
Fatigue Life Prediction for Cord-Rubber Composite Tires Using a Global-Local Finite Element Model, Jan. - Mar., 23

**D**

Daws, J. W.: Force Characteristics of Tire Tread Delamination, Jan. - Mar., 41

Deformation index
A Simple Method of Handling Thermomechanical Coupling for

Constitutive models
Evaluation of a Pseudo-Elastic Model for the Mullins Effect, Jul. - Sep., 120

Contact
Tire Modelling Methodology with the Explicit Finite Element Code LS-DYNA, Oct. - Dec., 236
Analysis of Tire Rolling Contact Response by REF Model, Oct. - Dec., 214

Contact patch
Measurement of the Slip of Tread Blocks in the Contact Patch, Apr. - Jun., 69

Crack growth rate
Fatigue Life Prediction for Cord-Rubber Composite Tires Using a Global-Local Finite Element Model, Jan. - Mar., 23

**D**

Daws, J. W.: Force Characteristics of Tire Tread Delamination, Jan. - Mar., 41

Deformation index
A Simple Method of Handling Thermomechanical Coupling for

Temperature Computation in a Rolling Tire, Apr. - Jun., 56
Dorfi, H. R.: A Study of In-Plane Force Transmission of Tires, Oct. - Dec., 188

## E

Energy dissipation
A Simple Method of Handling Thermomechanical Coupling for Temperature Computation in a Rolling Tire, Apr. - Jun., 56
Energy release rate (J-integral)
Fatigue Life Prediction for Cord-Rubber Composite Tires Using a Global-Local Finite Element Model, Jan. - Mar., 23
Experimental local friction law
Numerical Prediction of Car Tire Wear, Jul. - Sep., 164
Experimental local wear law
Numerical Prediction of Car Tire Wear, Jul. - Sep., 164
Explicit code
Tire Modelling Methodology with the Explicit Finite Element Code LS-DYNA, Oct. - Dec., 236

## F

FTIRE
A Study of the In-Plane Force Transmission of Tires, Oct. - Dec., 188
Failure
Fatigue Life Prediction for Cord-Rubber Composite Tires Using a Global-Local Finite Element Model, Jan. - Mar., 23
Farhenthold, Eric P..: see Han, Y. H., Jan. - Mar., 23
Finite element
FE Simulation of the Effect of Tire Design Parameters on Lateral Forces and Moments, Jul. - Sep., 146
Finite element method
Fatigue Life Prediction for Cord-Rubber Composite Tires Using a Global-Local Finite Element Model, Jan. - Mar., 23
Finite element modeling
Tire Modelling Methodology with the Explicit Finite Element Code LS-DYNA, Oct. - Dec., 236
Force characteristic
Force Characteristics of Tire Tread Delamination, Jan. - Mar., 41
Frictional energy
Measurement of the Slip of Tread Blocks in the Contact Patch, Apr. - Jun., 69
Full-scale experimental tests
Numerical Prediction of Car Tire Wear, Jul. - Sep., 164
Futamura, Shingo, Goldstein, Art: A Simple Method of Handling Thermomechanical Coupling for Temperature Computation in a Rolling Tire, Apr. - Jun., 56

## G

Gauterin, Frank: see Wang, Xu, Apr. - Jun., 81
Gelosa, E.: see Lupker, H., Jul. - Sep., 164
Goldstein, Art.: see Futamura, Shingo, Apr. - Jun., 56

**H**

Hall, W., Mottram, J. T., Jones, R. P.: Tire Modeling Methodology with the Explicit Finite Element Code LS-DYNA, Oct. - Dec., 236

Han, Y. H., Becker, Eric B., Farhenthold, D., Kim, D.M.: Fatigue Life Prediction for Cord-Rubber Composite Tires Using a Global Finite Element Model, Jan. - Mar., 23

**I**

Impulse characteristic
Force Characteristics of Tire Tread Delamination, Jan. - Mar., 41

Irregular wear
Measurement of the Slip of Tread Blocks in the Contact Patch, Apr. - Jun., 69

**J**

Jones, R. P.: see Hall, W., Oct. - Dec., 236

**K**

Keckman, A.: see Lupker, H., Jul. - Sep., 164

Kim, D. M.: see Han, Y. H., Jan. - Mar., 23

Koehne, S. H., Rieger, A.: Measurement of the Slip of Tread Blocks in the Contact Patch, Apr. - Jun., 69

**L**

LS-DYNA
Tire Modelling Methodology with the Explicit Finite Element Code LS-DYNA, Oct. - Dec., 236

Lupker, H., Cheli, F., Braghin, F., Gelosa, E, Keckman, A.: Numerical Prediction of Car Tire Wear, Jul. - Sep., 164

**M**

Mars, W. V.: Evaluation of a Pseudo-Elastic Model for the Mullins Effect, Jul. - Sep., 120

Matrix perturbation theory
Analysis of Tire Rolling Contact Response by REF Model, Oct. - Dec., 214

Mobility
Tire Acoustic Optimization Using Point Damping Method, Apr. - Jun., 81

Modal expansion techniques
Analysis of Tire Rolling Contact Response by REF Model, Oct. - Dec., 214

Morant, Eddie F.
In Memoriam. Apr. - Jun., 117

Mottram, J. T.: see Hall, W., Oct. - Dec., 236

Mullins effect
Evaluation of a Pseudo-Elastic Model for the Mullins Effect, Jul. - Sep., 120

N

Nasdala, L.: see Wei, Y. T., Oct. - Dec., 214
Non-linear tensile properties
  Material Characterization of Tire Cords and the Effects of Cord Thermal-Mechanical Properties on Tires, Jan. - Mar., 2

O

Olatunbosun, O. A., Bolarinwa, O.: FE Simulation of the Effect of Tire Design Parameters on Lateral Forces and Moments, Jul. - Sep., 146

P

Point damping
  Tire Acoustic Optimization Using Point Damping Method, Apr. - Jun., 81
Post-cure inflation
  Material Characterization of Tire Cords and the Effects of Cord Thermal-Mechanical Properties on Tires, Jan. - Mar., 2

R

Rieger, A.: see Koehne, S. H., Apr. - Jun., 69
Rolling tire
  A Simple Method of Handling Thermomechanical Coupling for Temperature Computation in a Rolling Tire, Apr. - Jun., 56
Rothert, H.: see Wei, Y. T., Oct. - Dec., 214

S

Saemann, Ernst-Ulrich: see Wang, Xu, Apr. - Jun., 81
Sidewall indentation thermal shrinking
  Material Characterization of Tire Cords and the Effects of Cord Thermal-Mechanical Properties on Tires, Jan. - Mar., 2
Simulation
  FE Simulation of the Effect of Tire Design Parameters on Lateral Forces and Moments, Jul. - Sep., 146
Slip measurement
  Measurement of the Slip of Tread Blocks in the Contact Patch, Apr. - Jun., 69
Steady-state
  Fatigue Life Prediction for Cord-Rubber Composite Tires Using a Global-Local Finite Element Model, Jan. - March, 23
Steady state rolling
  FE Simulation of the Effect of Tire Design Parameters on Lateral Forces and Moments, Jul. - Sep., 146
Stress-strain behavior
  Evaluation of a Pseudo-Elastic Model for the Mullins Effect, Jul. - Sep., 120

## T

Temperature distribution
A Simple Method of Handling Thermomechanical Coupling for Temperature Computation in a Rolling Tire, Apr. - Jun., 56
Thermal mechanical properties
Material Characterization of Tire Cords and the Effects of Cord Thermal-Mechanical Properties on Tires, Jan. - Mar., 2
Thermomechanical analysis
A Simple Method of Handling Thermomechanical Coupling for Temperature Computation in a Rolling Tire, Apr. - Jun., 56
Thermomechanical coupling
A Simple Method of Handling Thermomechanical Coupling for Temperature Computation in a Rolling Tire, Apr. - Jun., 56
Tire acoustic optimization
Tire Acoustic Optimization Using Point Damping Method, Apr. - Jun., 81
Tire cords
Material Characterization of Tire Cords and the Effects of Cord Thermal-Mechanical Properties on Tires, Jan. - Mar., 2
Tire design
FE Simulation of the Effect of Tire Design Parameters on Lateral Forces and Moments, Jul. - Sep., 146
Tire force transmission
A Study of the In-Plane Force Transmission of Tires, Oct. - Dec., 188
Tire model
FE Simulation of the Effect of Tire Design Parameters on Lateral Forces and Moments, Jul. - Sep., 146
Numerical Prediction of Car Tire Wear, Jul. - Sep., 164
Tire ride
A Study of the In-Plane Force Transmission of Tires, Oct. - Dec., 188
Tire ring model
Analysis of Tire Rolling Contact Response by REF Model, Oct. - Dec., 214
Tire tread delamination
Force Characteristics of Tire Tread Delamination, Jan. - Mar., 41
Tire wear
Measurement of the Slip of Tread Blocks in the Contact Patch, Apr. - Jun., 69
Tire wear prediction
Numerical Prediction of Car Tire Wear, Jul. - Sep., 164
Tires
Tire Modelling Methodology with the Explicit Finite Element Code LS-DYNA, Oct. - Dec., 236
Transient response
Analysis of Tire Rolling Contact Response by REF Model, Oct. - Dec., 214
Tread blocks
Measurement of the Slip of Tread Blocks in the Contact Patch, Apr. - Jun., 69

## V

Viscoelastic property
A Simple Method of Handling Thermomechanical Coupling for Temperature Computation in a Rolling Tire, Apr. - Jun., 56

## W

Wang, XU, Gauterin, Frank, Saemann Ernst-Ulrich: Tire Acoustic Optimization Using Point Damping Method, Apr. - Jun., 81
Wavelength
Tire Acoustic Optimization Using Point Damping Method, Apr. - Jun., 81
Wear behavior
Measurement of the Slip of Tread Blocks in the Contact Patch, Apr. - Jun., 69
Wei, Y. T., Nasdala, L., Rothert, H.: Analysis of the Tire Rolling Contact Response by REF Model, Oct. - Dec., 214
